

# Q4 e-tron

E-mobility in a new dimension.

# Electrified for everyday usability.

Progressive design that keeps its promises: The Audi Q4 e-tron brings the future of mobility to the road with class-leading cabin space for passengers and luggage. Fully electric, expressive and ready for every day.

## Charging made simple.

With the mobile and flexible e-tron charging system compact, you can charge the vehicle easily and conveniently at home. Wherever there is an accessible power socket. For faster charging, it is also compatible with industrial power sockets.

## Fast and efficient charging.

Battery charged from 10% to 80% in 28 mins at maximum DC charging power of up to 135 kW, and capable to charge up to 115km range in just 10 mins.

Final equipment subject to specification sheet.  
For detailed information, please contact sales hotline 2291 0000.  
Overseas model is indicated, specification and feature may differ in Hong Kong.

# Fascinatingly futuristic.

The clear design of the Audi Q4 e-tron gives a characteristic form to the future of electric mobility.

## Class-leading wheelbase.

The wheelbase of the Audi Q4 e-tron is the longest among its segment, and the flat floor design creates spacious interior and legroom for passengers in rear to enjoy pleasant long journeys.

## Light reimaged.

A choice of 4 daytime running light signatures combined with dynamic light sequencing demonstrates the pioneering lighting technology, and makes an impressively progressive statement.

## Agile handling for urban driving.

The turning circle of the Audi Q4 e-tron is 10.2 meters, which is the shortest among its class and even less than the Audi A1 and Q3. It offers flexibility when parking and maneuvering in urban areas.

Final equipment subject to specification sheet.  
For detailed information, please contact sales hotline 2291 0000.  
Overseas model is indicated, specification and feature may differ in Hong Kong.

# Functional sportiness.

The progressive interior of the Audi Q4 e-tron is characterised by technological innovation, sportiness and functionality.

## More room for more.

As a real all-rounder and family car, the Audi Q4 e-tron offers a generous selection of storage solutions – providing a total volume of 24.8 litres including the glove compartment. The luggage compartment of the Audi Q4 e-tron can stow 520 litres of luggage. With the rear seats folded down, the volume goes up to 1,490 litres.

## Ambience in a new light.

This lighting package creates a unique atmosphere and lends the interior of the Audi Q4 e-tron a fascinating ambience with a feel-good factor. Precise contour lighting emphasises the instrument panel, the centre console and other prominent design structures.

## The future in your hands: Steering wheels with touch operation.

The upper spokes feature touch surfaces in black-panel look with backlit functional areas to indicate the active buttons. Slight protrusions separate these from one another, making them easier to use, and the buttons provide gentle haptic feedback when pressed.

Final equipment subject to specification sheet.  
For detailed information, please contact sales hotline 2291 0000.  
Overseas model is indicated, specification and feature may differ in Hong Kong.

<b>Model</b>	<b>Q4 e-tron 45</b>
Engine type	Lithium-ion high-voltage battery powered, full electric
Battery capacity	82 kWh (gross)
Max. output	286 ps (210 kW)
Max. torque	545 Nm
<b>Power transmission</b>	
Drive type	Rear wheel drive
<b>Weights / capacities</b>	
Empty weight	2,125 kg
Perm. Total weight	2,640 kg
Permissible roof load limit / Support load	75/75 kg
<b>Mileage</b>	
Top Speed	180 km / h
Acceleration	0-100 km / h in 6.7 s
<b>Consumption</b>	
Fuel type	Electric
<b>Consumption and emission values according to WLTP</b>	
Combined	19.2-16.2 kWh / 100 km
Combined CO2 emissions	0g / km
Electric range (combined)	547 km

Explanatory note

1.

The power available in the individual driving situation depends on variable factors such as outside temperature, temperature, charging and conditioning status or physical aging of the high-voltage battery.
2.

The charging time/charging capacity of the battery can vary depending on various factors such as the ambient and battery temperature, the use of other country-specific plugs, the use of the preconditioning function (e.g. remote-controlled climate control of the vehicle), the power availability at the charging station, state of charge and Battery aging vary. The charging power decreases as the state of charge increases. The loading losses are taken into account. HPC: High Power Charging with DC.
3.

Unladen vehicle weight with driver (75 kg), determined according to the current version of Regulation (EU) 1230/2012. Optional equipment can increase the unladen weight and the drag coefficient of the vehicle, which reduces the possible payload and maximum speed accordingly.
4.

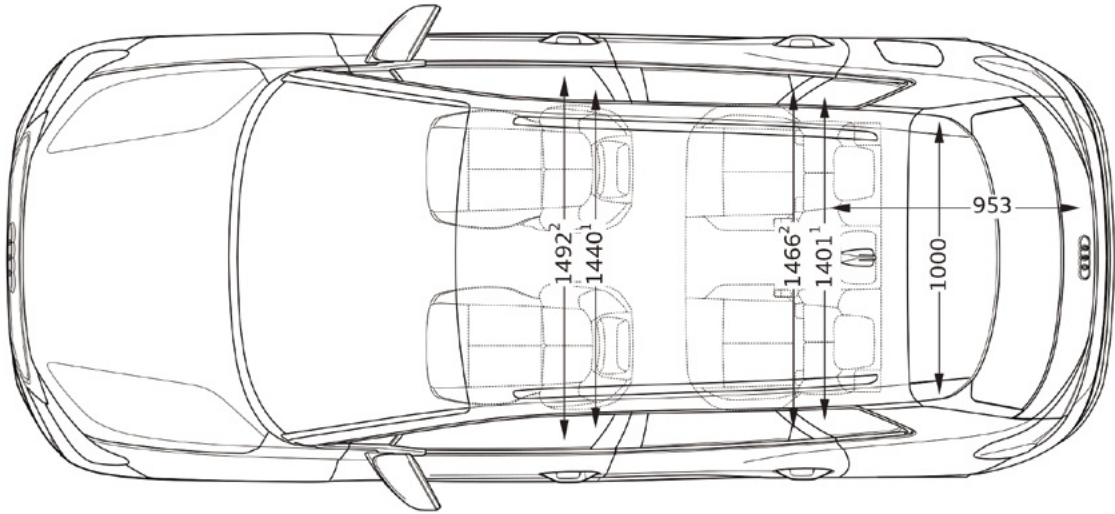

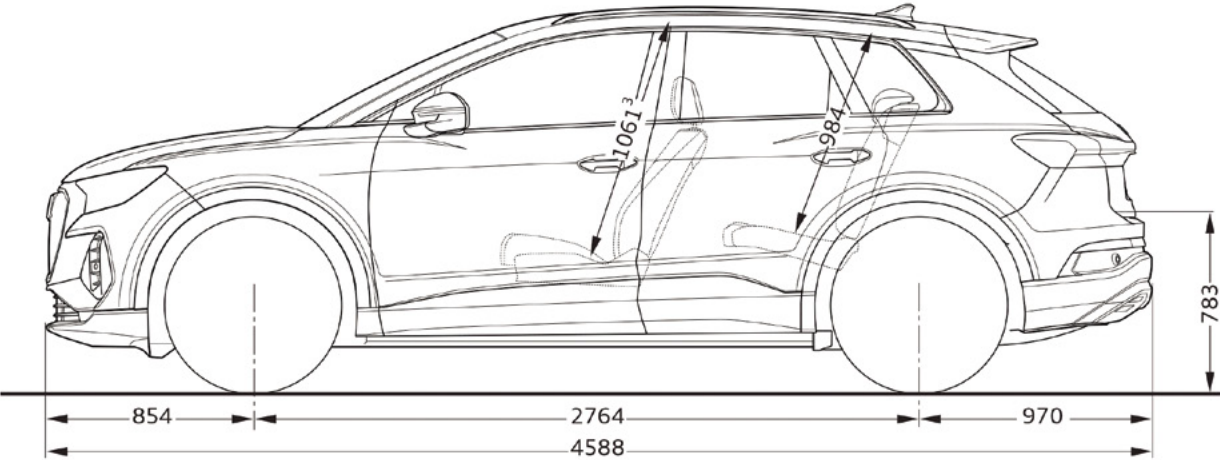

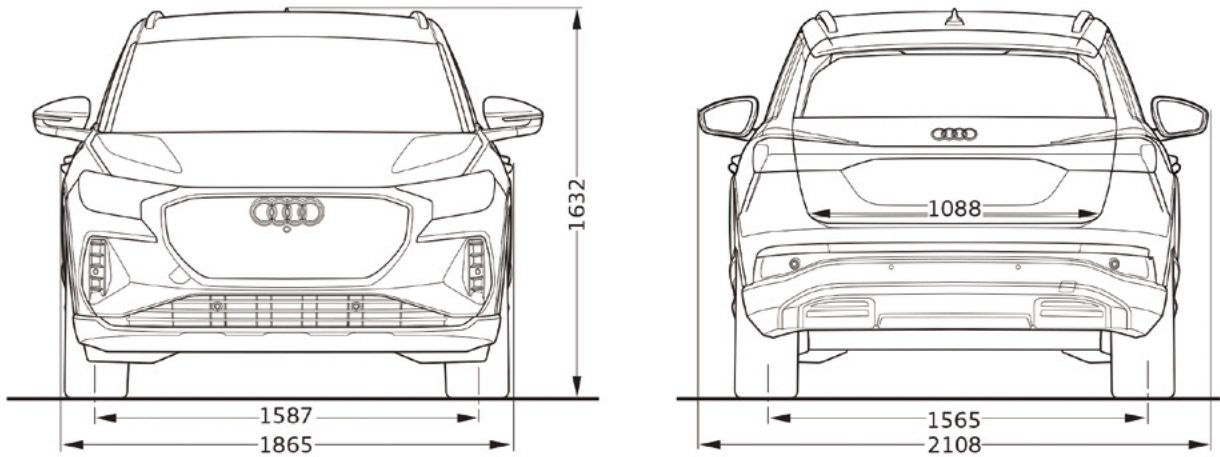

Further information on the official fuel consumption and the official specific CO 2 emissions of new passenger cars can be found in the “Guide to fuel consumption, the CO 2-Emissions and power consumption of new passenger cars” which is available at all sales outlets and at DAT Deutsche Automobil Treuhand GmbH, Hellmuth-Hirth-Str. 1, D-73760 Ostfildern or at [www.dat.de](http://www.dat.de) free of charge.

Audi Q4 e-tron

Dimensions in mm

Dimensions at unladen vehicle weight  
The values given are nominal values determined on the basis of data. They are based on the data available at the time of calculation and the defined equipment variant.

1) Shoulder Width   2) Elbow Width   3) Maximum headroom
